WHAT IS ASTHMA?

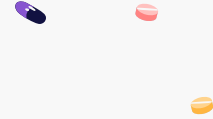

WHAT IS ASTHMA?

Asthma is a chronic disease that affects the airways of the lungs. In people with asthma, the airways become inflamed, swollen, and narrowed, making it difficult to breathe.

WHAT CAUSES ASTHMA?

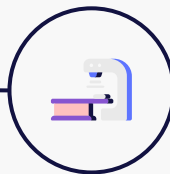

WHAT CAUSES ASTHMA?

The exact cause of asthma is not fully understood, but it is believed to result from a combination of genetic and environmental factors.

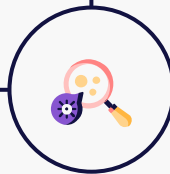

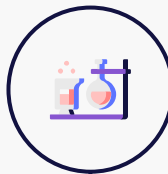

Common Triggers

Exercise

Allergens (pollen, dust mites, pet dander)

Cold air

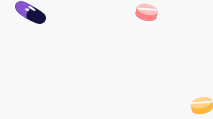

Respiratory infections

Stress and strong emotions

Smoke and air pollution

SIGNS AND SYMPTOMS

SIGNS AND SYMPTOMS

Common symptoms of asthma include:

- Wheezing
- Shortness of breath
- Chest tightness

- Difficulty sleeping due to breathing problems

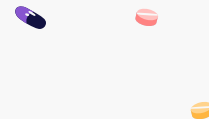

SIGNS AND SYMPTOMS

Severe Symptoms:

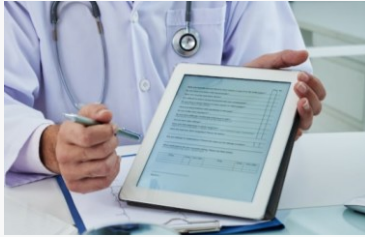

- Rapid Breathing
- Blue lips of fingernails
- Difficulty Speaking

TESTING

TESTING

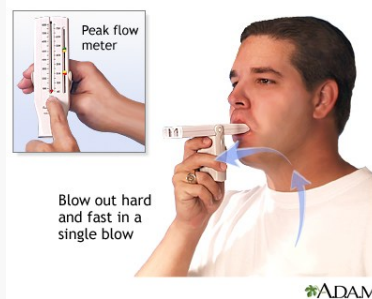

**Medical
history review**

**Physical
examination**

**Spirometry
test**

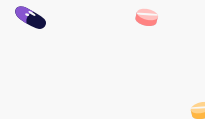

**Peak flow
measurement**

Allergy testing

TREATMENT

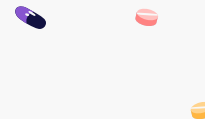

TREATMENT

Treatment Options

- Quick-relief inhalers (rescue inhalers)
- Long-term controller medications
- Avoiding triggers
- Asthma action plan
- Regular medical follow-up

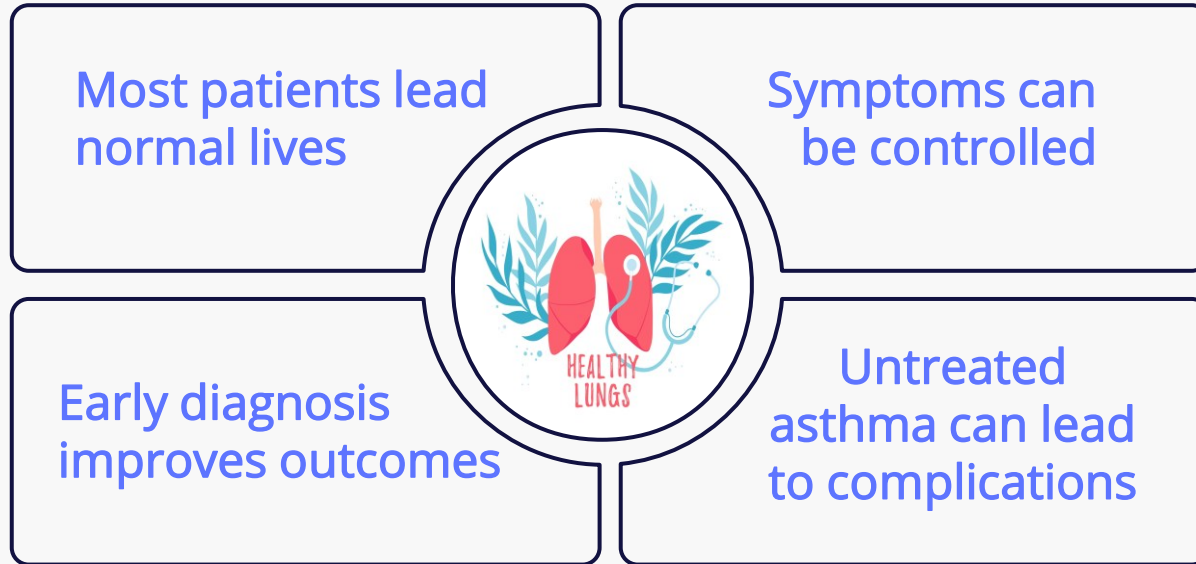

PROGNOSIS

PROGNOSIS

Generally good when properly managed.

Thank you
