SITUATION ANALYSIS

INTERNATIONAL ICE-CREAM MARKET

BANGLADESH ICE CREAM MARKET:

ICE CREAM INDUSTRY’S JOURNEY IN BANGLADESH

Igloo pioneered Bangladesh's modern branded ice cream industry.

Polar scaled the category and became **the first** dairy brand with **ISO 22000 certification**.

Chocobars, cones, and cake boxes reshaped everyday consumption.

Favorites like Malai and Doi alongside gourmet lines turned ice cream into a **premium** treat.

CONSUMER TRENDS OF CONSUMING ICE-CREAM

Consumers are seeking better-quality, differentiated indulgence.

Consumers are increasingly exposed to **diverse and innovative** flavour experiences.

40% of surveyed consumers consume ice cream for enjoyment, while **~39%** consume it for refreshment.

49% of surveyed consumers discover ice-cream products through **social media**, making digital content a major discovery channel.

SITUATION ANALYSIS

COMPETITOR ANALYSIS

Brand	Market Share*	Hero Products	Price Position	Flavour/Product Territory	Competitive Strength
	38%	Kheer Malai, Chocolate, Mango	Mainstream–Premium	Broad Variety	Leadership + Distribution
Lovello	14%	Sticks, Cups, Family Packs	Mainstream	Everyday Variety	Scale + Assortment
	9%	Pistachio, Chocobite, Black Forest	Mainstream–Premium	Traditional + Indulgent	Variety + Value

KEY TAKEAWAYS

- Vanilla & chocolate dominate consumer flavour preferences.
- Robusto has established premium equity, led by Chocobar’s strong popularity
- Pista Kunafa is an emerging flavour with room to build demand.

MARKET SIZE

SITUATION ANALYSIS

CONSUMER INSIGHT

Consumers are showing greater interest in **higher-quality, premium ice-cream** experiences, creating room for products beyond basic offerings.

Exposure to **international and unconventional** flavours is expanding consumers' willingness to try something new.

Consumers are becoming more attentive to **quality and ingredient considerations**, influencing how they evaluate ice cream.

Ice cream is increasingly moving beyond a purely **summer/refreshment occasion** toward a **broader lifestyle and indulgence product**.

Consumers still value **familiar Bangladeshi flavours**, but are simultaneously interested in new flavour experiences.

Not every consumer can frequently eat something expensive for premium experience.

So We've
learned that..

CONSUMERS SEEK PREMIUM, EXCITING
INDULGENCE, BUT PRICE LIMITS HOW
FREQUENTLY THEY CAN AFFORD IT.

"I WANT TO TREAT MYSELF WITH
SOMETHING EXCITING AND PREMIUM, BUT
I CAN'T AFFORD TO DO THAT ALL THE
TIME."

PROBLEM IDENTIFICATION

SYMPTOMS

Too dependent on the Dubai/Kunafa trend

Strong for trial, but not enough repeated purchases

Not yet a regular treat choice

consumers need to find it easily and often enough to support frequent purchase.

Its premium price can make frequent purchase harder.

CORE ISSUE

HOW CAN WE TURN THE
EXCITEMENT OF “I WANT TO TRY
THIS” INTO “I WANT ROBUSTO PISTA
KUNAFI WHEN I WANT TO TREAT
MYSELF”?

IDENTIFYING TARGET MARKET

	 GEOGRAPHIC	 DEMOGRAPHIC	 PSYCOGRAPHIC
14-18	Students ▪ Middle-income ▪ School/college	Urban Bangladesh	• Trend-driven • Curious • Novelty-seeking
19-22	University students ▪ Middle-income	Urban Bangladesh	• Social • Experimental • Discovery-driven
23-28	Young professionals ▪ Middle-income	Urban Bangladesh	• Discovery-driven • Quality-conscious • Self-rewarding • Selective

IDENTIFYING TARGET MARKET

PRIMARY TARGET MARKET

#1

Students | Middle Income
The Trend Explorer

LOCATION

Urban & Semi-Urban Areas
(Dhaka, Chattogram, Sylhet)

AGE

14-18 Years

LIFESTYLE

Social, trend-driven, hangs out with friends

Personality

Curious

Adventurous

Easily excited by novelty

Pain Points

- New trends quickly become boring
- Wants exciting food experiences
- Limited spending power

SECONDARY TARGET MARKET

#2

University Students | Middle Income
The Experience Seeker

LOCATION

Urban & semi-urban areas
(Dhaka, Chattogram, Khulna)

AGE

19-22 Years

LIFESTYLE

Social life, hangouts, dates, spontaneous treats

Personality

Experimental

Social

Discovery- Driven

Pain Points

- Wants new experiences without overthinking them
- Seeks small moments of indulgence
- Premium treats aren't an everyday choice

TERTIARY TARGET MARKET

#3

Early-career professionals |
The Self-Treat Seeker

LOCATION

Major hubs
(Dhaka, Chattogram, Sylhet)

AGE

23-35 Years

LIFESTYLE

Work + leisure, dining out, personal downtime, dates and after-meal treats

Personality

Quality-conscious

Self-rewarding

Selective

Pain Points

- Wants small moments of personal gratification
- Needs premium experiences to feel worth the price
- Seeks indulgence beyond ordinary choices

BIG IDEA

CRACK THE ORDINARY

Why “CRACK THE ORDINARY”?

- Turns the product's unique crack-and-reveal into a memorable brand ritual.
- Connects with the need for small escapes from everyday routine.
- Makes premium indulgence feel fun, deliberate and worth sharing.
- Gives Robusto a distinctive territory beyond simply “delicious ice cream.”

Plan of Action

Phase 01
Tease

Phase 02
Ignite

Phase 03
Ritualize

Plan of Action (Tease)

Online Marketing

Video Contents

Every piece of content, paid or organic - centers the crack-open moment. Slow-motion, Reel, ASMR-style snap sound, reaction shots. This is the one consistent visual signature across all platforms.

Platform split

Facebook (still the highest-reach platform for mass Bangladeshi audiences - events, group content, retailer tagging) + Instagram/Reels-style short video (trend-native audience, influencer seeding, UGC challenge hosting)

UGC challenge

"Show us your crack" - users post their own reveal-moment video with the campaign hashtag; best/most creative entries get featured on the brand page and win prizes (ties directly into the game below).

Digital-to-store

every post includes a "find your nearest crack spot" location-tagged call-to-action, and quick-commerce/delivery app partnerships close the gap between craving and purchase instantly.

Influencer seeding:

prioritize creators whose audience already overlaps with campus/hangout culture, briefed to produce authentic group-reaction content rather than scripted ads, matches the case's explicit ask for content, not advertisement.

Plan of Action (Ignite)

The Interactive Game: "Crack & Win"

Online mechanic

Every wrapper hides a QR code revealed only once the bar is physically cracked open (ties the digital game to the real sensory act, not a generic sticker code). Scanning launches a short digital "crack" mini-game a swipe/tap gesture mimicking the snap which unlocks an instant prize tier:

a discount code on the next purchase, a free bar, branded merch, or an entry into a grand prize draw (e.g., a hangout event sponsorship for their friend group, or a Dubai-trip-themed prize to reinforce the global-trend positioning).

Offline mechanic:

At Thursday activation events and sampling booths, a large novelty "crack booth", a giant prop chocolate shell participants tap or team up to break open, reveals instant prizes on the spot, with the moment itself designed to be filmed and shared (feeding back into the online UGC challenge).

Why this works for both price sensitivity and occasion-ownership

the game turns the purchase into a mini-lottery moment layered on top of the existing product experience — it doesn't discount the core price, but it adds a "might win something extra" upside that lowers the psychological barrier to buying weekly. And because it's most active around Thursday events specifically, it reinforces the ritual cue rather than existing as a generic, disconnected promotion.

Plan of Action (Ritualize)

Offline Campaign: "Thursday Crack Nights"

Where It Happens

Rotates across 2–3 fixed high-footfall hangout hubs (campus gates, office buildings, café streets, mall plazas) rather than a different location every week, repetition builds recognition ("that's the crack spot") faster than novelty does.

Team-based crack booth mechanic

turns sampling into a small social game rather than a passive handout, this is what makes the offline event feel like an event, not just a promo table.

Content capture zone

exists specifically to feed the online UGC challenge from earlier, offline generates the raw content, online amplifies it, so the two channels reinforce each other instead of running separately.

Retail tie-in

converts the free-sample energy into an actual paid purchase within the same night, closing the loop between "I tried it" and "I bought it."

Content carry-forward

means Thursday night's best clips become Monday/Tuesday's teaser content for the next Thursday, this is what turns a weekly event into a self-sustaining rhythm instead of needing fresh creative from scratch every time.

TIMELINE & FEASIBILITY

 STRATEGY	 TIMELINE	 FEASIBILITY
 Video Content	Week 1–8	 High — reusable content; low production complexity
 Platform Split	Week 1–8	 High — uses existing digital platforms
 Influencer Seeding	Week 1–4	 High — micro-creators keep costs manageable
 UGC “Show Your Crack”	Week 2–6	 High — simple user-generated mechanic
 Digital-to-Store	Week 2–8	 Medium-High — links digital interest to nearby purchase
 Crack & Win — Online Game	Week 3–6	 Medium — requires QR/game development
 Thursday Crack Booths	Week 3–8	 Medium — requires permits, manpower & logistics
 Team-Based Crack Mechanic	Week 3–8	 High — simple activation mechanic
 Content Capture Zone	Week 3–8	 High — integrated into existing booths
 Retail Tie-in	Week 3–8	 Medium-High — requires retailer coordination
 Content Carry-Forward	Week 4–8	 High — repurposes existing UGC/event content

TIMELINE (8 WEEKS)

OVERALL FEASIBILITY

 Digital strategies:	 Highly feasible
 UGC/influencer:	 Highly feasible
 Retail integration:	 Moderately feasible
 Physical activations:	 Moderately feasible
 QR game:	 Moderately feasible

Campaign Budget — Tk 23.0 Lakh

Tease -> Ignite -> Ritualize | "Thursday Crack Nights" activation plan

Budget Breakdown by Activity

Where the Money Goes

Budget is a planning assumption based on proposed campaign activities; actual costs depend on media rates, locations, creator fees and activation scale.

KPI & Risk Planning

- Penetration: New buyers reached ↑
- Trial: First-time purchases ↑
- Repeat: Repeat-purchase rate ↑
- Distribution: Outlet coverage ↑

- Availability: Stock-out frequency ↓
- Sales: Units sold ↑
- Revenue: Sales value ↑
- Conversion: Trial → repeat conversion ↑

RISK MANAGEMENT

“Scale Only When the Numbers Say GO”

OUR PRINCIPLE

Measure. Learn. Optimize.
Scale only when the numbers say **GO**.

OUR APPROACH

- Real-time KPI monitoring
- Early warning triggers
- Clear action plans
- Go/Optimize/Stop framework

OUR FOCUS

Protect product quality, profitability and brand equity while building sustainable demand.

RISK		P	I	TRIGGER	PLAN B
	Stockout	M	H	Persistent OOS	Replenish → slow media
	Cold-chain failure	M	H	Storage issue	Stop activation → relocate
	Margin erosion	M	H	Promo dependence rises	Replace discounts with rewards
	Low Trial	M	H	Awareness ↑, Trial ↓	Increase sampling/activation
	Low Repeat	M	H	Trial ↑, Repeat ↓	Diagnose product/value/occasion
	Competitor Copy	M	M/H	Similar offer launches	Own “THE CRACK”
	Low UGC	M	M	Reach ↑, participation ↓	Simplify challenge
	Poor ROMI	M	H	Below approved threshold	Reallocate/stop weak channels

P = Probability I = Impact H = High (Red) M = Medium (Amber)

GO → OPTIMIZE → STOP

	GREEN	KPI on target	→	SCALE
	YELLOW	Early warning	→	OPTIMIZE
	RED	Threshold breached	→	ACTIVATE PLAN B
